EDUCATION

Full Stack Developer

SoyHenry

11/2021 - 05/2022

Part-time · Duration: 7 months

Courses

- Deep Dive Javascript
- FrontEnd
- BackEnd
- Web Server
- Data Base
- Individual Project
- Group Project

WORK EXPERIENCE

Full Stack Developer

Byte4Bit

11/2022 - Present

Achievements / Responsibilities

- Developed and maintained full stack applications for internal and client-facing products using Node.js, TypeScript, React, and Next.js.
- Implemented microservices, REST APIs and GraphQL, third-party integrations, and cloud services.
- Contributed to scraping, automation, document processing, notifications, and payments projects.
- Worked across multi-repo and monorepo architectures, Docker, testing, and engineering best practices.

Account Manager

Admotion IT SRL

11/2012 - 09/2018 *Buenos Aires*

Achievements / Responsibilities

- Provided customer support for company products and services.
- Managed digital marketing campaigns including retargeting, prospecting, fully tailored, CPC, CPL, and ERS.
- Oversaw projects and services such as Admotion TV and AEP (Admotion E-Commerce Platform).
- Reference: Lorenzi Pablo - pablolorenzi@gmail.com

Safety and Hygiene Coordinator

Instituto Martin Buber

11/1995 - 09/2012

Achievements / Responsibilities

- Managed, organized, hired, trained, and evaluated the security staff (8 people).
- Led training sessions and assigned roles to teachers, staff, and students for evacuation plans and fire prevention drills.
- Organized, evaluated, and executed evacuation drills.

SKILLS

NODE.JS · TYPESCRIPT · NESTJS · EXPRESS · REACT · NEXT.JS · GRAPHQL · MONGODB · POSTGRESQL · PRISMA · DOCKER · AWS · PUPPETEER

PROJECTS

Group Project - E-Commerce - 'Atoch' (05/2022 - 06/2022)

- Built an e-commerce site using NextJS, Auth0, EmailJS, Redux, NodeJs, and Algolia for the front end. Styling was implemented with Chakra UI and Tailwind. The back end used PostgreSQL, Sequelize, and Express. Mercado Pago was used for payments. url: https://atoch.herokuapp.com/

Individual Project - Full Stack Developer - 'The Dogs App' (04/2022 - 05/2022)

- Built an SPA using React and Redux for state management. Components were developed with plain CSS. The SPA consumes data from an API and a DB through a back end built with Node.JS, Express, PostgreSQL, and Sequelize. Includes search bar, filters, and a controlled breed creation form. https://mauroclientdogs.herokuapp.com/

Featured Projects

Selection of relevant projects and workstreams. Priority is given to initiatives representative of work carried out at Byte4Bit and related developments.

Audit1 - Microservices Ecosystem

Authentication services, developer API, notifications, core CRUD, and intelligent policy reading.

- Built and maintained backend services focused on business logic and integrations.
- Worked with APIs, authentication, documents, and information processing.

Stack: TypeScript, Hono, Express, MongoDB, Python, Flask, OpenAI API, Docker

---

TWL / TWLPro - Platform and Integrations

Suite of microservices for accounts, identity, files, analytics, payroll, and integrations with multiple platforms.

- Implemented backend services and integrated flows on top of a modular architecture.
- Used relational persistence, validations, serverless patterns, and cloud integrations.

Stack: NestJS, TypeScript, PostgreSQL, TypeORM, AWS Lambda, Cognito, S3, Docker

---

Scraping and Automation Suite

Automated extraction services for multiple platforms, captcha solving, and cloud storage.

- Automated headless browser flows, concurrent execution, and post-processing.
- Integrated storage and external services for persistence and orchestration.

Stack: Node.js, Express, Puppeteer, Puppeteer Cluster, 2Captcha, AWS, Google Cloud Storage

---

Xell / Delipay / Propify / Mooveri

Web products and services for e-commerce, payments, backoffice, APIs, and full stack experiences.

- Developed modern frontends and backends with integrations, realtime features, and data processing.
- Worked on monorepos, management panels, payments, notifications, and business support services.

Stack: Next.js, React, Apollo, GraphQL, Prisma, Firebase, SendGrid, Socket.IO, Stripe, PayPal, RabbitMQ

Complementary Technical Stack

- Frontend: React, Next.js, Styled Components, Sass, Storybook, Cypress.
- Backend: Node.js, TypeScript, NestJS, Express, Hono, Flask, GraphQL, Apollo.
- Data & infrastructure: MongoDB, PostgreSQL, Prisma, TypeORM, Docker, AWS, Firebase, PM2.
- Integrations & utilities: Plaid API, OpenAI API, SendGrid, MQTT, WebSockets, PDF/XLSX/CSV/QR.
- AI-assisted development: Codex / ChatGPT for prototyping, refactoring, documentation, and debugging with own technical review.
